Water Resources Engineering Department-College of Engineering-
Salahaddin University

Site Visit

On November 4th, 2025, the third-year students of the water resources engineering department visited the Cardiac Center Hospital with Dr Alan Habib, the trip focusing on reinforced concrete elements, finishing works, and mechanical system (Heating, Ventilation, and Air Conditioning, firefighting, and safety).

Department Meeting

On Monday, November 24th, 2025, the Water Resources Engineering Department held its monthly meeting. The meeting covered planning for the upcoming spring semester, preparations for the fall final exams, and organizing upcoming academic activities.

New Academic Year

The beginning of the new academic year for the first year students in the Water Resources Engineering Department for year 2025-2026.

Welcome and we hope it will be the beginning of a successful chapter in your academic and professional life.

Scientific Trip

As part of the department's scientific mission, the students of the Water Resources department had a scientific trip to Bekhal Bapshtyan Artificial Fall and Kawlokan weir, on October 16th 2025.

The aim of the trip was to enhance students' practical understanding of hydraulic structures and water flow management.
